Banking Whistleblower...

I used to help people get into debt, and at times, plenty of it!

You see I worked for one of Australia's largest organisations, and then went into showing people how to get rich by using so called 'good debt'.

Then in 2007 I discovered that banks (and Governments) literally make money out of thin air.

Don't believe me, ask me how by PM'ing me or say 'How' in the comments below.

The game of DEBT is just that, and through manipulation of the rates and markets, every now and then the game of musical chairs means someone misses out on a chair.

I've been calling the banks out on the manufacturing of money (cyber digits) for a long time now, and NOT one has ever taken me to task on it, go figure...
